

JULIAN SANTIAGO BARBOSA ALVARADO

Senior Software Engineer — Backend & Cloud Architecture

Bogotá, Colombia | +57 316 828 6189 | julianbarbossa@hotmail.com | linkedin.com/in/julianbarbossa9 | jsb9.netlify.app

PROFESSIONAL SUMMARY

Senior Software Engineer with ~5 years of experience building backend systems and cloud-native architectures. Strong background in serverless AWS architecture (Lambda, DynamoDB, Step Functions, EventBridge, SQS/SNS, API Gateway), event-driven and microservices design, REST API development, and CI/CD automation. Hands-on experience with Python (Django REST Framework, FastAPI) alongside deep expertise in Node.js/TypeScript (NestJS, Express). Comfortable owning systems end to end: API design, business logic, data modeling (PostgreSQL/SQL), testing, and production deployment.

CORE SKILLS

Languages: Python, TypeScript, JavaScript, PHP, SQL, Bash

Backend / APIs: FastAPI, Django REST Framework, NestJS, Express, Laravel, REST API design, microservices, event-driven architecture

Cloud / AWS: Lambda, DynamoDB, API Gateway, Step Functions, EventBridge, SQS/SNS, AppSync, Cognito, CDK (IaC), S3, Amplify

Databases: PostgreSQL, MySQL, DynamoDB, MongoDB

DevOps / Tooling: Docker, CI/CD (CodePipeline, GitHub Actions, Bitbucket Pipelines), Git, Linux, SonarQube

Testing: Unit, integration and e2e testing (Jest, Pytest, RTL, Cypress, Playwright)

Practices: Clean Architecture, Scrum/Kanban, Agile, AI-assisted development (Claude, Copilot, Cursor)

WORK EXPERIENCE

Full Stack Senior Developer — Mensajeros Urbanos

Jul 2025 – Jul 2026 | Bogotá, Colombia

- Built a serverless urban courier management platform on AWS handling bookings, couriers, shipments, routing, geocoding, billing, notifications, and real-time tracking, exposing 20+ categories of REST endpoints.
- Designed and implemented infrastructure as code with AWS CDK (TypeScript): 100+ Lambda functions, DynamoDB with streams for async processing, SQS/SNS for messaging, Step Functions for orchestration, EventBridge for events, AppSync (GraphQL), API Gateway (REST), and Cognito for auth.
- Implemented event-driven architecture with workers and projectors to keep read models updated and process operations asynchronously at scale.
- Set up CI/CD with AWS CodePipeline and Bitbucket Pipelines, including automated testing, SonarQube quality gates, and Slack deployment notifications across dev, QA, and production.

Full Stack Developer — Earth Innovation Institute

Jan 2024 – Jul 2025 | Bogotá, Colombia

- Built a landscape conservation platform using Next.js/TypeScript (frontend) and Laravel REST API (backend) to manage and monitor conservation projects.
- Containerized frontend and backend with Docker and deployed on Azure for high availability and scalability.
- Wrote unit/integration tests (Jest, Laravel testing) and implemented CI/CD with GitHub Actions, maintaining code quality via reviews and static analysis.

Full Stack Developer — Ministerio de Agricultura (UPRA)

Jan 2024 – Dec 2024 | Bogotá, Colombia

- Built an agricultural data collection application using NestJS (backend) and Angular (frontend) for regulatory compliance.
- Implemented crop validation logic (transitory, permanent, and forage crops) with strict data-accuracy rules, covered by Jest unit tests.

Software Engineer — Akorbi

Aug 2022 – Aug 2023 | Bogotá, Colombia

- Developed a scheduling and interpreter-recruitment platform with React and Node.js, improving scheduling/payment rendering performance.
- Contributed to a GraphQL-based scheduling system, improving UI efficiency and achieving an 80% qualified-candidate match rate.

- Tested and debugged software, improving process efficiency by 18%.

Software Engineer — TicSocial

Aug 2021 – Aug 2022 | Bogotá, Colombia

- Built a patient-management platform for health companies/EPS in Colombia using React (frontend) and Django (backend).
- Used Python and Docker to streamline deployment and improve efficiency of medical appointment scheduling.
- Built REST APIs serving a JS frontend, supporting over 500,000 concurrent users.

Software Engineer Intern — Accenture

Jan 2021 – Aug 2021 | Bogotá, Colombia

EDUCATION

B.S. in Multimedia Engineering

Universidad Militar Nueva Granada — Bogotá, Colombia | Sep 2017 – Apr 2022
